Focus	Reading Closely and Writing to Learn	Reading for Research and Writing an Argument	Working with Evidence	Understanding Perspectives		
Module Title	Myths: Not Just Long Ago	Insecticides: Costs vs.	Rules to Live By	Sustaining the Oceans		
Description	<p>Students study the purposes and elements of mythology. Students read Rick Riordan’s <i>The Lightning Thief</i> with a focus on the archetypal hero’s journey and close reading of the many mythical allusions. They also read complex informational texts about the elements of mythology.</p> <p>As a whole class, students will closely read several complex Greek myths, and then work in small groups to build expertise on an additional myth. Students then develop their narrative writing skills as they create their own hero’s journey narrative.</p>	<p>Students consider the balance between human needs and environmental consequences as they read the novel <i>Frightful’s Mountain</i> and complex informational texts about the benefits and drawbacks of the use of DDT. They learn how to trace and evaluate an argument in written texts and videos on this topic, and conduct both supported and independent research. Through structured discussions and decision-making protocols, students form their own argument about the use of DDT. Students then apply their research to write a position paper in which they support that claim with evidence.</p>	<p>How do people formulate and use “rules” to improve their lives and communicate these “rules” to others? Students consider these questions as they read a variety of texts. They begin with <i>Bud, not Buddy</i>, analyzing character development and considering how figurative language contributes to tone and meaning. They then read closely Steve Jobs’ speech, (focusing on how Jobs develops his ideas at the paragraph, sentence, and word level) and analyze the poem “If” to compare and contrast how the novel and the poem address a similar theme. In an argument essay, students establish a claim about how Bud uses his rules. Finally, students conduct a short research project related to their own “rules to live by” and then write an essay to inform about one important “rule to live by.”</p>	<p>Students study how an author develops point of view and how an author’s perspective, based on his or her geographic location, is evident in his or her writing. Students consider point of view as they learn about ocean conservation and the impact of human activities on life in the oceans. They read Mark Kurlansky’s <i>World without Fish</i>, and analyze how point of view and perspective is conveyed, and trace the idea of fish depletion throughout the text. Students also read <i>Flush</i>, a high-interest novel and excerpts of an interview with author Carl Hiaasen to determine how his geographic location in Florida shaped his perspective and how his perspective is evident in his novel. To conclude the module students write an informative consumer guide about buying fish to be put in a grocery store</p>

Common Core ELA Standards Formally Assessed, by Module

- In the curriculum map below, any specific CCSS with a check mark indicates formally assessed.
- Some standards are formally assessed in multiple modules.
- “B” modules will assess all the same standards as “A” modules but may address additional standards.
- Because of the integrated nature of the standards, even standards that are not formally assessed are often embedded in instruction throughout every module (e.g., RI/RL.1).
- Some standards are not applicable in an on-demand assessment context (e.g., R.10 or W.10). In the curriculum map below, these standards are noted as “integrated throughout.”
- Some standards (e.g., W.2) have a main or “parent” standard and then subcomponents (e.g., W.2a). Often, students’ mastery of the entirety of this standard is scaffolded across multiple modules. Therefore, in the curriculum map below, the “parent” standard is checked only if all components of that standard are formally assessed within that particular module. Otherwise, just the specific components are checked.
